DNV Columbus Offers More Services in Houston

Columbus, OH USA: The DNV Columbus office (formerly CC Technologies) has expanded its services in Houston. Now in addition to corrosion control services, the Houston office offers pipeline integrity assessment and management.

The DNV Columbus office in Houston has expanded its staff and resources in order to offer clients pipeline integrity management services, such as in-line inspection analysis, pressure cycle fatigue analysis, remaining life assessments, probability of exceedance, defect growth and assessment, etc. Leading the integrity management services will be Pam Moreno. Moreno has 24 years of experience working with a leading in-line inspection company as the director of analysis worldwide. She has also served as both the vice president and president of the In-Line Inspection Association, helping to write the current regulations for ILI. Moreno will serve as a senior project manager for DNV. She hopes to bring more ILI projects to DNV and utilize the skills she has gained through her years of experience.

Gray Sarmiento also joined DNV as a senior engineer. Sarmiento is from Colombia, South America where she worked for 10 years with a gas transmission company as a pipeline integrity coordinator working on in-line inspections, coatings, cathodic protection, corrosion, risk management and other integrity issues. Sarmiento will coordinate pipeline integrity projects out of Dallas, Texas.
